

What could possibly go right.....?

A more mobile timeline

The new state-funded hospital service, Natural Health Systems (NHS), calls on upgrades to out-dated bio-healers. More funding is being allocated to remodel “Life Light” bio-photon healers, with energy workers being recruited to restore life -force energy med-bed facilities.

The new governor has included in his manifesto, an investment in highly trained and supported workers, entering the industry with every resource available to them.

He aims to reduce waiting times from the current high of one week, to an improved two days.

The future of free power started a long time ago with NASA’s historic Breakthrough Propulsion Physics Programme (BPP). The programme brought into being diametric drive. These systems are helping to advance our relationship with Earth and live a more mobile timeline.

With horticulture and agriculture now being taught along other subjects such as reading, writing and arithmetic at primary schools and secondary schools, we are seeing a massive increase in the quality of home-grown farming and horticulture practices. From the cultivation of crops, soil science and tractor mechanics, we are increasing our capacity to be equipped for generations to come. With the huge investment comes a huge return for our future.
